

3D Star

Cut and fold to create a three dimensional star—add a piece of string and turn it into an ornament!

1. Color the star pieces.
2. Cut out.
3. Mountain fold the stars on the points and valley fold between the points along the gray lines.
4. Take the star piece with the tabs and fold the tabs under and apply glue, then carefully align it with the other star piece. Tuck in a piece of string during this step, if desired.
