

# Frosty Animals

Create a trio of 3D critters that live in snowy places!

1. Color the animals.
2. Cut out.
3. Fold on all of the dotted lines.  
For the penguin: fold it in half and then fold the feet forwards.
4. For the bear: cut the slit and slide the ears into the slit.
5. For the reindeer: glue the body together, cut the slits for the legs and antlers, and slide the pieces into the slits.

**TIP:** For sturdier animals, print on cardstock or glue pieces to another piece of paper.
